Skills

Java, J2EE, Servlet, JSP 1.2/2.1, JDBC, EJB, RMI, JMS,.

Work Experience

Full Stack Developer

Capital One, VA - August 2016 - 2019

- Responsibilities Develop/program new functionality and features in line with functional specifications and business requirements.
- Created custom plugins, templates, and functions for AngularJS application.
- Designed and implemented the user interface using HTML5, CSS3, JavaScript and AngularJS.
- Applied J-Query scripts for basic animation and end user screen customization purposes.
- Used AJAX and JSON to make asynchronous calls to the project server to fetch data on the fly.
- Involved with bug fixing on functionality, performance and designing issues with JavaScript JQuery, HTML5, CSS3 and AngularJS.
- Used NPM (Node Package Manager) for Node.js development.

FULL STACK DEVELOPER

ABC Corporation - 2015 - 2016

- Worked with Node.js and Backbone.js to build a single page application with a .NET Web API backend that provided users a way to consolidate their shipping needs across multiple marketplaces.
- Actively participated in release planning, sprint planning, and estimation sessions.
- Developed an internal application that tracked the life of an order through a windows service and MongoDB.
- Evaluated and recommended new web technologies such as architectures, patterns, languages, and plug-ins based on ShipStations short term and long term objectives.
- Improved SQL Server performance with stored procedure refactors and new constraints and indexes.
- Used TeamCity and MSBuild to better improve our deployment process to both RackSpace and AWS environments.
- This is Dummy Description data, Replace with job description relevant to your current role.
